SUMMARY

Results-oriented Data Analyst with a strong foundation in data analysis, data cleaning, statistical analysis, and data visualization. Proficient in Excel, SQL, Python, and Power BI, with the ability to transform raw data into meaningful insights and actionable business recommendations. Skilled in developing dashboards, reports, KPIs, and data-driven solutions to support business decision-making. Strong analytical, problem-solving, and communication skills with a keen ability to identify trends, patterns, and opportunities for process improvement.

PROJECTS

Customer Shopping Behaviour Analysis: Python, MySQL, Power BI

- **Analyzed** shopping behavior across 3,900 transactions in Python to uncover spending patterns and customer segments, guiding strategic business decisions.
- **Cleaned** and engineered the dataset by imputing missing ratings, standardizing columns, and creating `age_group` and `purchase_frequency` features to prepare data for analysis.
- **Conducted** SQL-based analysis in MySQL, revealing male customers generated **2× more revenue** than female customers (\$157.9K vs. \$75.2K).
- **Identified** that repeat buyers (>5 purchases) were nearly **3× more likely to subscribe**, informing loyalty program recommendations.
- **Built** an interactive Power BI dashboard with dynamic filters to visualize revenue and sales trends across categories and age groups.

EXPERIENCE

Data Analysis Intern — Cognifyz IT Solutions Pvt. Ltd.

Aug 2026 – Sep 2026

- **Analyzed** a restaurant dataset containing 9,551 records and 21 variables using SQL to identify trends in cuisines, city distribution, ratings, pricing, delivery, and restaurant chains.
- **Performed** data-driven analysis using SQL and Python concepts, including data validation, aggregation, statistical analysis, and correlation analysis, identifying a positive relationship between restaurant votes and ratings.
- **Derived** actionable insights from price-range and service-availability analysis, including online delivery and table-booking patterns, and documented findings through a comprehensive analytical report.

EDUCATION

Anjuman Institute Of Technology And Management, Bhatkal

Bachelor of Engineering in Computer Science (CSE) — CGPA: 7.32

2023-2027

SDM College, Ujire

Pre-University Course (PCMS) — Percentage: 90.33%

2021-2023

Anand Ashram High School, Bhatkal

SSLC — Percentage: 87.2%

2020-2021

TECHNICAL SKILLS

- Programming: Python, SQL, Java
- Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Microsoft Excel
- Databases: MySQL, MongoDB
- Statistical Analysis: Data Cleaning, Exploratory Data Analysis(EDA), ETL, Hypothesis Testing, KPI Analysis
- Machine Learning: Regression, Classification, Clustering, Feature Engineering, Scikit-learn
- Tools: Jupyter Notebook, Git, GitHub, VS Code

CERTIFICATIONS

- SQL and Relational Databases 101 – IBM Skills Network Sep 2026
- Data Analytics Job Simulation – Quantum (Forage) Aug 2026
- Data Analytics Job Simulation – Deloitte (Forage) Jun 2026
- Networking Basics – Cisco Networking Academy Nov 2025
